Weekly Spend & Efficiency Trend — Trend Analysis

How performance evolved week-over-week through March

DEEP DIVE

2/14

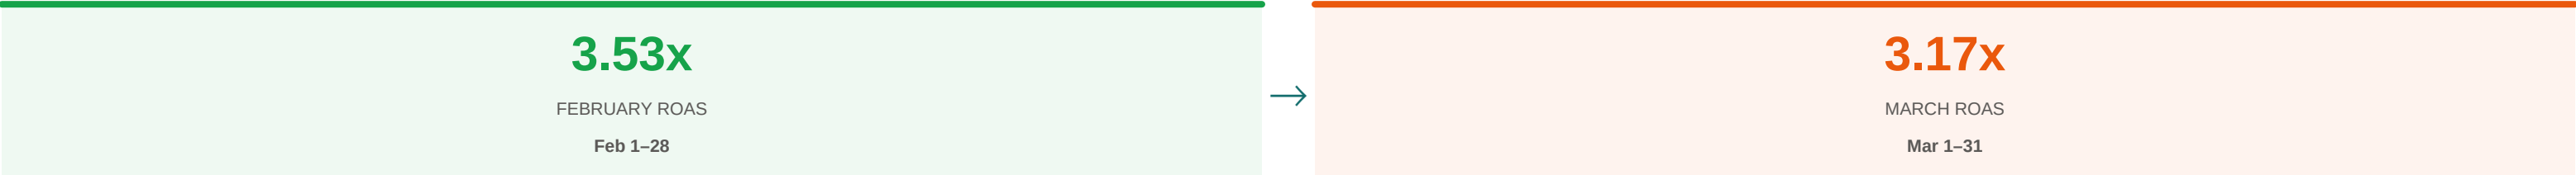

\$2.44M TOTAL SPEND ▲ +41.9%	3.17x ROAS ▼ -10.2%	\$194.91 CPA ▲ +31.3%	12,504 CONVERSIONS ▲ +8.0%	465K CLICKS	1.2% CTR
---	--	--	---	-----------------------------------	--------------------------------

- WHAT

March spend jumped 42% MoM to \$2.44M, driving 8% more conversions but at a 31% higher CPA of \$195 vs \$148 in February.
- SO WHAT

The efficiency drop indicates incremental budget was allocated to lower-performing inventory — ROAS fell from 3.53x to 3.17x as the budget scaled into weaker campaigns.
- NOW WHAT

Prioritize reallocating budget toward top-ROAS campaigns (Brand Exact at 9.4x, Remarketing at 3.94x) and tighten bids on campaigns delivering ROAS below 2.5x.

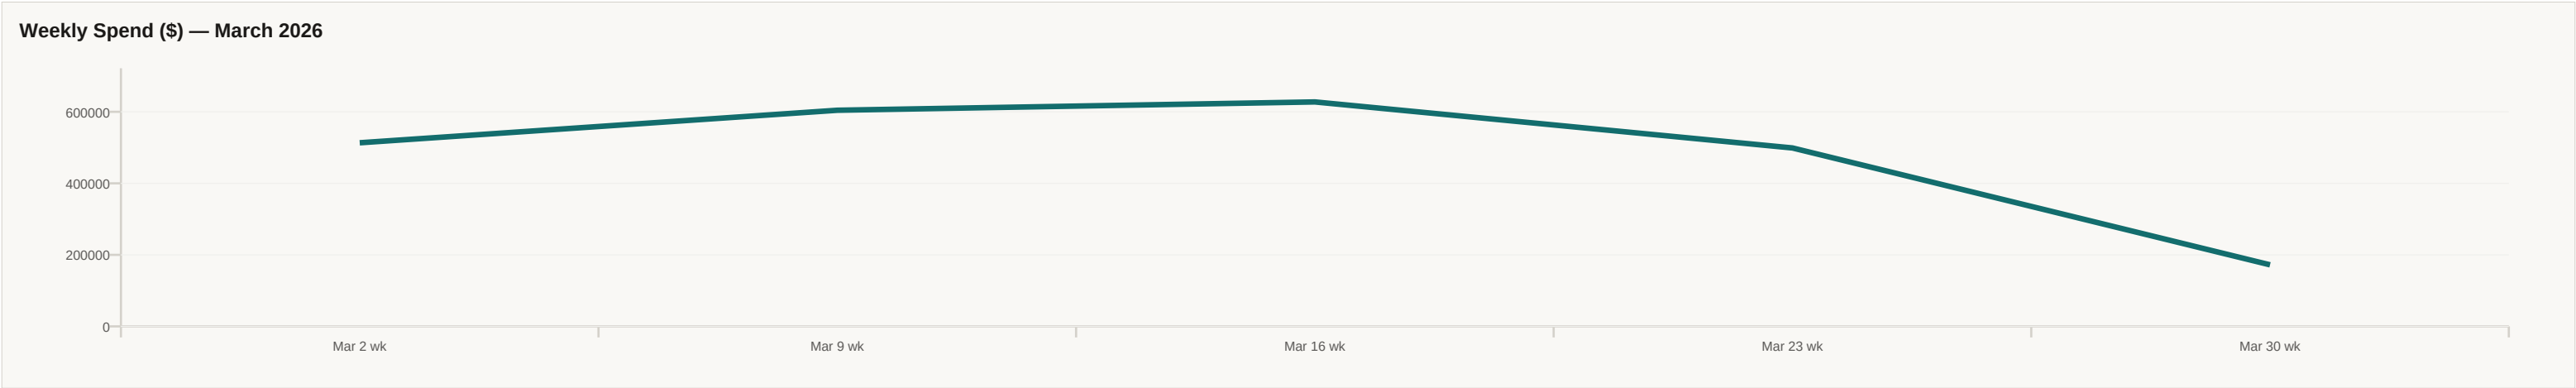

Weekly Spend & Efficiency Trend — Analysis

How performance evolved week-over-week through March

DEEP DIVE

3/14

Weekly Performance Breakdown

Week	Spend	Conversions	ROAS	CPA
Mar 2–8	\$513K	3,005	3.28x	\$171
Mar 9–15	\$604K	2,942	2.97x	\$205
Mar 16–22	\$628K	2,678	2.82x	\$234
Mar 23–29	\$499K	2,711	3.62x	\$184
Mar 30–31	\$172K	1,004	3.52x	\$171

Top-Performing Campaigns — Performance Table

Campaigns delivering highest ROAS and conversion efficiency

DEEP DIVE

4/14

■ Week of Mar 16 was the worst efficiency week — \$628K spent at 2.82x ROAS and \$234 CPA. Avoid similar over-pacing in April.

Top Campaigns by ROAS — March 2026

Campaign	Spend	ROAS	CPA	Conversions
4AllPromos Brand - Exact	\$100.8K	9.39x	\$84.52	1,192
Dynamic Remarketing - Cart Abandoners	\$13.5K	3.94x	\$153.35	88
Shopping 1 - Samples Audience	\$317.1K	3.40x	\$193.54	1,639
DSA Keyword Expansion	\$52.8K	3.22x	\$134.06	394
Shopping 2 - Default Offer General	\$52.2K	3.07x	\$193.82	269

Underperforming Campaigns

Campaigns consuming budget below efficiency thresholds

DEEP DIVE

6/14

✔ Brand Exact campaign at 9.39x ROAS is 3x more efficient than the account average. Increasing budget here delivers the highest marginal return.

Campaign Performance vs February

Month-over-month comparison for top 6 campaigns

COMPARISON

7/14

Underperforming Campaigns — March 2026

Campaign	Spend	ROAS	CPA	Issue
Search General Terms [DSK]	\$42.5K	1.84x	\$320.58	Low ROAS
Search General Terms AI Max	\$42.9K	2.06x	\$330.36	Low ROAS
Demand Gen - General Industry	\$18.0K	2.25x	\$293.41	Low ROAS
4AllPromos Competitors	\$85.9K	2.61x	\$252.12	High CPA
Shopping 3 - Samples Queries	\$1.02M	2.85x	\$220.76	Low ROAS vs Feb 3.36x

\$185K

SPEND IN SUB-2.5X ROAS CAMPAIGNS

Excluding Shopping 3 which scaled significantly — General Terms + Demand Gen + Competitors combined

MoM Campaign Performance (Feb vs Mar 2026)

Campaign	Feb Spend	Mar Spend	Feb ROAS	Mar ROAS	ROAS Δ
Shopping 3 - Samples Queries	\$657K	\$1.02M	3.36x	2.85x	-15%
Shopping 1 - Samples Audience	\$241K	\$317K	3.40x	3.40x	0%
Shopping 3L - Default Queries	\$140K	\$160K	3.45x	2.83x	-18%
Shopping 2M - Samples General	\$134K	\$229K	3.63x	3.03x	-17%
Brand Exact	\$50.8K	\$100.8K	13.96x	9.39x	-33%
DSA Keyword Expansion	\$47.9K	\$52.8K	3.84x	3.22x	-16%

■ WHAT

Every major campaign that scaled in March saw ROAS decline. Brand Exact dropped 33% ROAS as spend doubled from \$51K to \$101K.

■ SO WHAT

These campaigns appear to have hit efficiency ceilings — incremental budget is bidding on lower-intent queries.

■ NOW WHAT

Use tighter ROAS targets and bid caps when scaling Brand Exact and Shopping campaigns in April to preserve efficiency.

Keyword Performance

Top keywords by spend — efficiency winners and losers

DEEP DIVE

9/14

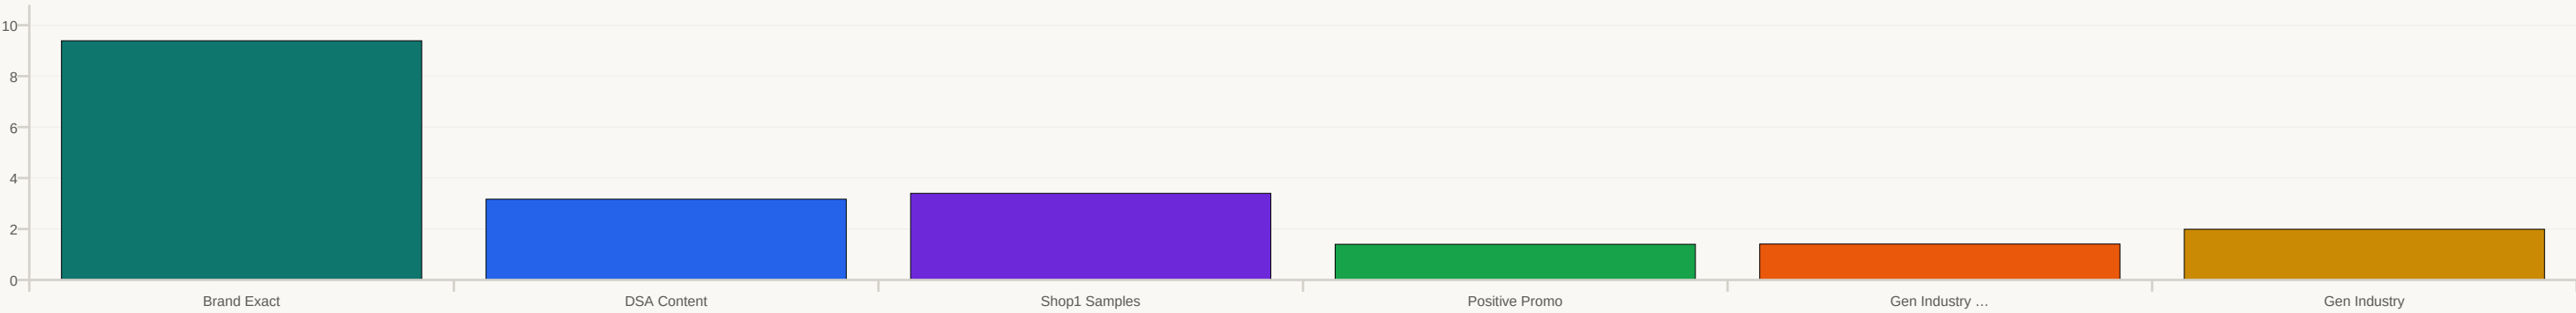

Top Ad Groups

- Variations to 4AllPromos (Brand) — 9.39x ROAS, \$85 CPA
- Content Categories (DSA) — 3.17x ROAS, \$131 CPA
- All Samples (Shopping 1 Audience) — 3.4x ROAS, \$194 CPA
- All Pens (Search Product) — 2.54x ROAS, \$102 CPA

Bottom Ad Groups

- Positive Promotions (Competitors) — 1.4x ROAS, \$243 CPA
- General Industry Terms AI Max — 1.41x ROAS, \$329 CPA
- General Industry Terms — 1.99x ROAS, \$266 CPA
- All Products (Demand Gen) — 2.25x ROAS, \$293 CPA
- 4imprint (Competitors) — 2.72x ROAS, \$272 CPA

Ad Group ROAS Comparison

Top Keywords by Spend — March 2026

Keyword	Campaign	Spend	CPA	CTR
4imprint	Competitors	\$50.5K	\$270.26	2.3%
4allpromos	Brand Exact	\$39.0K	\$54.60	50.3%
4 imprint	Competitors	\$11.6K	\$332.84	2.4%
4 all promos	Brand Exact	\$9.7K	\$63.69	42.4%
positive promotions	Competitors	\$5.4K	\$242.63	7.6%
vistaprint	Competitors	\$3.9K	\$161.59	1.5%
all4promo	Branded Expanded	\$3.3K	\$125.85	3.8%
promotional items	General Industry	\$3.2K	\$308.24	11.2%
4 allpromotions	Brand Exact	\$3.1K	\$768.29	28.0%
all for promo	Brand Exact	\$2.8K	\$983.29	34.3%

✕ Brand variant keywords '4 allpromotions', 'all for promo', 'all4promos' have CPA of \$768–\$1,343. These are likely low-intent misspellings — review and add as negatives or reduce bids significantly.

- Multiple ad creative updates applied on Apr 27 — ad copy and status changes across key ad groups
- Bid optimizations focused on Shopping Samples, Default Offer, and Brand campaigns
- Change frequency consistent with daily automated bid management for active campaigns

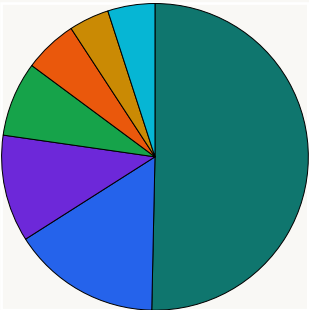

AI-Managed Changes

- Target ROAS adjustments across 50+ ad groups
- Bid tuning on Shopping Samples campaigns
- Search campaign bid refinements
- Automated daily bid cadence maintained

Team-Managed Changes

- Campaign-level ROAS target updated Apr 27
- Ad creative refresh — copy + status updates
- Ad approval and status changes applied

March Spend by Campaign (Top 7)

- Shopping 3 Sample... (50.3%)
- Shopping 1 Sample... (15.6%)
- Shopping 2M Sampl... (11.3%)
- Shopping 3L Defau... (7.9%)
- Search Product (5.6%)
- Competitors (4.2%)
- Brand Exact (5.0%)

- Shopping 3 Samples | Queries = 41.8% of total spend (\$1.02M) — largest single campaign
- Top 3 Shopping campaigns combined: \$1.57M (64.3% of total spend)
- Brand Exact: only 4.1% of spend but 9.39x ROAS — most under-invested relative to return
- Competitors + Demand Gen: \$104K combined at 2.5x average ROAS — consider reducing

April Action Plan — Impact Summary

Action	Priority	Est. Impact
Increase Brand Exact budget +25–30%	High	+ROAS at 9.39x
Pause General Industry Terms (<2.1x ROAS)	High	-\$85K low-eff spend
Negate brand misspelling keywords (\$768–\$1,343 CPA)	High	CPA reduction
Scale Dynamic Remarketing (3.94x ROAS)	Medium	+Conversions
Add bid floors on Shopping 3 (ROAS -15% MoM)	Medium	Stabilize ROAS
Reduce Competitors campaign bids	Medium	-CPA from \$252
Refresh Demand Gen creatives (2.25x ROAS)	Low	+Engagement

■ RECOMMENDED ACTIONS

- Increase Brand Exact campaign budget by 25–30% — highest ROAS at 9.39x, currently under-invested at 4.1% of spend
- Pause or reduce bids on General Industry Terms [DSK] and AI Max — both below 2.1x ROAS at \$320+ CPA
- Add 'all for promo', 'all4promos', '4 allpromotions' as negatives or cut bids — CPAs of \$768–\$1,343 indicate low-intent traffic
- Increase Dynamic Remarketing budget — Cart Abandoners at 3.94x ROAS and \$153 CPA is highly efficient at only \$13.5K spend
- Review Shopping 3 Samples pacing — ROAS fell from 3.36x to 2.85x as spend grew 55% MoM; add bid floors
- Reduce Competitors campaign budget or tighten bids — \$86K at 2.61x ROAS below account average
- Test new ad creative on Demand Gen — current 2.25x ROAS suggests creative or audience fatigue

\$2.44M MARCH SPEND	3.17x MARCH ROAS	\$194.91 MARCH CPA	12,504 MARCH CONVERSIONS
---	--	--	--

What Worked

- Brand Exact: 9.39x ROAS — clear efficiency leader
- Dynamic Remarketing: 3.94x ROAS on cart abandoners
- Shopping 1 Samples Audience: Stable 3.4x at scale
- DSA Keyword Expansion: 3.22x ROAS, \$134 CPA
- Week of Mar 23 recovery to 3.62x ROAS shows self-correction

What To Fix

- General Industry Terms: 1.84–2.06x ROAS — needs immediate attention
- Competitors campaign: \$252 CPA vs \$195 account avg
- Weekend spend (80% drop) — ensure budget caps are set correctly
- Brand misspelling keywords driving \$768–\$1,343 CPA
- Shopping 3 ROAS decline from 3.36x to 2.85x as spend scaled

“Shifting just 10% of budget (\$244K) from sub-2.5x ROAS campaigns to Brand Exact and Remarketing could recover an estimated \$200K+ in conversion value monthly.”

— Based on current ROAS differential: 9.39x vs 2.0x average underperformers
